

Artist Andy Park has continued to gift fans with concept art from Captain America: Civil War. This time, the artist has given us a look at a far more comic-accurate Baron Helmut Zemo, complete with his purple mask and sword. Park revealed the piece on his Twitter account, adding, "I painted this Baron Zemo for #CaptainAmericaCivilWar. At the end of the day his traditional comic book look didn't make sense for the story." Zemo was played by Daniel Bruhl in the film, though he didn't don a costume of any kind. At the end of the film, the villain is alive and in custody, though he succeeded in his plan to fracture The Avengers. Time will tell if Zemo ever suits up in his traditional costume, though after seeing art like this, it's hard not to wish for it.
