

Rumour has it that Avengers: Infinity War is already shooting in Atlanta, so it should come as no surprise to see that the Russo Brothers are hard at work on creating some of the highly anticipated movie's props. What on Earth is going on in the video below is hard to say, but something big is clearly being created, and the directors captioned this image with only the intriguing, "Infinity prop." If you can figure out what this is, then let us know in the comments section, but more will hopefully be revealed from the movie when cast members start arriving in Atlanta next year. Set photos are possible, but unlikely if most of the action takes place in outer space and will be studio based as a result. It feels like a long time since Earth's Mightiest Heroes were assembled in the heart of New York!
