

The cover art for Justice League Dark is finally here, and yes, it puts Batman right in the centre. To be fair, it does sound like he plays a key role in the movie and using him to help sell it regardless of how much screen time he has is a pretty smart move on the part of Warner Bros. Animation. The studio has also announced that it will debut digitally on January 24th, 2017 and on DVD and Blu-ray on February 7th, 2017. With any luck, this will be successful enough to help move along the live-action version. In Justice League Dark, Matt Ryan returns to the role of John Constantine alongside Jason O'Mara as Batman, Camilla Luddington as Zatanna, Nicholas Turturro as Deadman, Ray Chase as Jason Blood/Etrigan, Roger R. Cross as John Stewart/Swamp Thing, Jeremy Davies as Ritchie Simpson, Rosario Dawson as Wonder Woman, Jerry O'Connell as Superman, Enrico Colantoni as Felix Faust, and Alfred Molina as Destiny.
