

Earlier today, I was contacted by David DelaGardelle of Mad Dwarf Workshop, who was kind enough to share the following pictures and details about the creation of the sword we saw being wielded by Heimdall in Marvel Studios' THOR. Below, I've included a few excerpts from the full behind-the-scenes report on how they crafted the impressive weapon, but highly recommend clicking [HERE](#) for even more details and images. In November of 2009, Swordsmith David DelaGardelle and Metal Artisan Andy Davis of the Mad Dwarf Workshop were contacted by the production team working on bringing Marvel Comic's legendary comic book Thor to the big screen. They were looking for swordsmith's capable of crafting a huge, intricately detailed, legendary hero weapon for the formidable and powerful character, Heimdall. Without hesitation, we took on this incredible but difficult task in the short time the production team had given us. Setting out we had no idea
