Thanks to my good friend from SpiderMedia, ReallrOnMaN, for the following images. Take a look at the design on the bottom right hand side of the top picture (in the reflection of Captain America's shield) for what might just be our first glimpse of the live action version of the Red Skull and the second for a pretty cool look at a piece of art featuring his villainous stare! Captain America: The First Avenger is set to be released in 3D on July 22, later this year!
