

A true American hero, Captain America not only fought the forces of evil during World War II, but also bolstered his fellow soldiers with his unwavering bravery. To celebrate the real men and women who defend our country day in and day out, the Army and Air Force Exchange Service—the Department of Defense's oldest and largest Exchange service—has teamed with Marvel Custom Solutions to offer a free Captain America comic that not only exemplifies Cap's effect on his fellow soldiers, but will also give readers an early peek at the world of "Captain America: the First Avenger" opening on July 22. The all-new, 32-page comic, written by William Harms and illustrated by Shawn Martinbrough, will be available in every Exchange store worldwide, hitting in the United States first and making its way around the world soon after. Check out a lengthy interview with the writer of the special comic book and some preview
