

Various members of the Avengers: Infinity War cast have been seen sporting clothing with a cool new logo for the movie, but as we mentioned at the time, it seemed interesting that Marvel had seemingly dropped the "Avengers" prefix, making it part of the title itself. After all, the logo is recognisable enough at this point that simply titled it Infinity War would work! Potentially adding more weight to that theory is yet another new title treatment which has surfaced today because, as you can see, it ditches "Avengers" and puts the logo in the background. Of course, Marvel frequently changes their logos as time goes by, but with the Guardians of the Galaxy taking centre stage alongside a wealth of other characters who aren't members of Earth's Mightiest Heroes, it does make sense that this movie would be retitled Infinity War to make it feel like an event which encompasses the entire Marvel Cinematic Universe. What do you guys think? As always, let us know
