

Here we have an image from Wonder Woman #8, in which Princess Diana dons a new costume before making her way to The Underworld. As you can see, she's added some body armor, a skirt, a sword and shield. And in the preview page below you'll see that she's now using some guns to help get the job done also. It's not known yet if this new gear will be a permanent thing, or she will revert back to her old look when the battle is over, but other sites are reporting on this as if it's something that will last a while anyway. Would you like to see Wonder Woman like this from now on? Or did you prefer her old look? For the full preview of issue #8 click the link below.
