

From DC's The Source.. Of all the villains being reintroduced within DC – THE NEW 52, none have been anticipated more than this one. He has not appeared inside a DC comic since early 2009 — DARKSEID! Superstar artist and DC Co-Publisher Jim Lee brings his razor sharp design skills to the greatest villain in the DC pantheon. Originally conceived and designed by Jack Kirby, the King of Comics himself, Darkseid's redesign has the Kirby motif all over him. Jim has taken what made Darkseid a fearsome foe from his original incarnation and provided the big bad with a 21st century design flair for even more malevolence. As awesome as this pic is, he really doesn't look very different from the previous incarnation of the character. Not that that's a bad thing. See Darkseid cause all sorts of trouble for Superman, Batman and co in Justice League #4 on sale December 21st. By TwitterButtons.com
