

Marvel have released a fourth teaser for the X-Men books set to come out following the events of "Schism" and it's Rogue and X-Men Legacy who get the spotlight this time. However, the lads over at Bleeding Cool have noticed something pretty interesting, and that is the fact that these teasers all link up...it seems like we're going back to the blue and gold teams of the 90s! With two more (seemingly meaning two more titles) set to be released, and so many characters still in silhouette, the plot thickens!
