

Conan the Barbarian producer Fredrik Malmberg had some very interesting remarks to share with Fangoria about the upcoming film. First he discusses why we will once again see a Conan origin story in the movie. He then goes on to point out some things that he feels, separates this version of Conan from the classic Arnold Schwarzenegger films so many of us are familiar with. On telling the origin of Conan... "If we get Conan right, we have re-established the franchise and we can then go ahead with adaptations of the original stories. First we have to get the Conan character into people's minds. He's a complex character, and I believe we, like [1982 film director John] Milius, had to tell some kind of origin story. Fans don't think that's necessary, but we still have to please the studio system and the executives and marketing. And you see, the majority of the audience
