

It's very interesting to look at the evolution of these films. Like, if you watch the original 54 film, this light-hearted film would appear to be the complete opposite of that. Gojira was a moody, depressing film. Son of Godzilla is a light-hearted adventure about the King of the Monsters teaching his son Minya the ropes of being a Godzilla. It's interesting how a series evolves over time. Son of Godzilla is a 1967 film famous for one thing: the first appearance of the infamous Minya, who would go on to appear in three more films. Son of Godzilla is a different kind of Godzilla film, even for the Showa era. It has a lot of heart, and deepens Godzilla's character. Official description from Sony TriStar: On an uninhabited island, United Nations scientists experiment with changing the climate, cooling desert temperatures to provide more fertile land for growing crops. Unfortunately, the experiment takes an
