

Justice League has been the definition of "epic" all-star" and "comic book." A world-destructive plot, great characters, top notch art, and blockbuster dialogue. I have never given such positive ratings in a roll like this, each issue has gotten a 9/10 for me. The \$3.99 price feels worth it. It is definitely the best series I'm reading currently, only rivaled by Marvel's Venom. Now, onto the review. The story continues with Victor, now Cyborg, waking up and realizing he isn't human. Meanwhile, Aquaman decides to put himself in charge of the group, but that's quickly changed when hordes of the mysterious creatures from the last two issues appear. They are vanquished, but when a portal opens and Cyborg jumps out saying "He's coming," that could mean only one thing.... It's easy to forget that this first arc takes place five years earlier. The solicitation for Issue Seven reminded me of that. With that
