

With news recently breaking that Warner Bros. Pictures is actually moving forward with a Justice League movie, once again a new beacon of hope lighted up on our hearts, after all, Marvel's The Avengers proved that a team-up superhero movie can work. Will Beall is set to write a script for it, and comic book industry legend Mark Millar himself said that he heard that the script is "dark and mature", which would make it very different in tone compared with The Avengers. But well, with the confirmation that the movie is in development, and a script is being written, what story it could follow? Here I have five ideas that a Justice League Movie could use, and that keep in mind, the movie doesn't have to necessarily follow every important aspect of these stories, but mostly the basic idea and add its own magic. 1) Justice League: Tower Of Babel Tower of
