

When most people think of Aquaman, they start to laugh and I don't blame them. The most famous interpretation of him is from the super friends cartoon and, as corny as those characters were, Aquaman received the least amount of praise. His history in comics show that even the creators and writers were worried about his fate. At one point, he was given a hook to make him look cooler and that still didn't work out like the writers wanted. It is only fair to assume that an Aquaman movie would be a big risk. Even including him in a Justice League movie could be bad because the audience would most likely expect him to be the weaker link. However, if his inclusion or movie is done right, he could become some people's favorite hero. Here is my formula on how to make an Aquaman movie successful. Show His Powers Weather you are
