

The last couple of Logan images posted to the WponX Instagram page haven't been especially revealing, but this latest one does give us a close-up of Reaver leader Donald Pierce's (Narcos actor Boyd Holbrook) robotic arm. In the comics, Pierce is a full cyborg who despises mutants and has caused The X-Men all sorts of problems over the years as member of not only The Reavers, but also The Hellfire Club and The Purifies. The Logan trailer would seem to suggest that the character will take more of a henchman type role in the movie, but either way we can definitely look forward to seeing him face-off against Wolverine at some point.
