

The original filming schedule for The Amazing Spider-Man called for 90 days and kicked off December 6th, 2010. However, that 3-month shoot turned into a 6-month shoot, wrapping in mid-May 2011. Inevitable reshoots occurred, kicking off in New York in November 2011 and finally wrapping in Los Angeles on December 2011. Of course the heavily CGI'd Lizard and web-slinging scenes required editing and VFX treatment, meaning that the film was not officially complete until May 20, 2012. As of today, 2:54 pm PST the last VFX shot for The Amazing Spider-Man delivered. [twitter.com/MarcW/status/2...](https://twitter.com/MarcW/status/2511111111)— Marc Webb (@MarcW) May 20, 2012 Tallying all this up, it took 1 yr 5 months and 14 days to complete The Amazing Spider-Man once cameras started rolling. Sony began working on the script for the sequel before filming was even complete and has set May 02, 2014 for its release. Applying the same amount of time it
