

Independence Day: Resurgence was a terrible movie, and the fact that fans of the first instalment waited twenty years for it made it all the more disappointing. The critical and commercial response has made a third instalment unlikely (it was no Jurassic World or Star Wars: The Force Awakens, that's for sure), but if you need a refresher on why exactly it was so bad, this Honest Trailer will certainly help. Poking fun at the terrible performances, awful script, and many disappointments, this may be one of Screen Junkie's best efforts yet (particularly when it comes to what they say about Liam Hemsworth's weird screams). What did you guys think of Independence Day: Resurgence? Do you agree with this honest trailer? As always, be sure to let us know your thoughts in the comments section below.
