

Daniel Espinosa's upcoming sci-fi drama LIFE has been kept under heavy lock-and-key, but tonight Sony has finally released the first official trailer for the movie, starring Ryan Reynolds (Deadpool), Jake Gyllenhaal (Nightcrawler), Rebecca Ferguson (Mission Impossible - Rogue Nation), Hiroyuki Sanada (The Wolverine), Olga Dihovichnaya, and Ariyon Bakare. The film centers around a crew from the International Space Station making their way to Mars in search of signs of extraterrestrial life - and, well, you can see for yourself what they find in the first official trailer and the international trailer below. LIFE tells the story of the six-member crew of the International Space Station that is on the cutting edge of one of the most important discoveries in human history: the first evidence of extraterrestrial life on Mars. As the crew begins to conduct research, their methods end up having unintended consequences and the life form proves more intelligent than anyone ever expected. Follow @_Kr08
