

The original story about a group of scientists who are reduced to microscopic size and injected via ship into the body of an ill colleague is taking on a new dimension in the version now in active development for 20th Century Fox. As first reported by Deadline Cameron, busy with two sequels to Avatar among other projects, does not plan to direct and Shawn Levy (Real Steel) is attached as the helmer. "I gave him my idea about how this should be turned into a love story and he's really run with it," says Cameron who noted that the script (originally written by Shane Salerno) with its complex premise has to be just right before it can get to the production level. Cameron says it's about two thirds of the way there so far in the development process. Much like Titanic the new Voyage has a real emotional
