

While Disney announced roughly an hour ago that Marvel's The Avengers flick would be released in the ever-growing 3D format, the writer & director Joss Whedon has opened up on the matter exclusively with Joblo. Ultimately promising that the format usage won't be repulsive, for those concerned, read on below! Whedon knew from the very beginning his film would eventually be converted to 3D saying he thought about the format "every second" while filming. Whedon is sensitive to the concerns of audiences admitting "there definitely are movies that shouldn't be in 3D" while assuring fanboys "THE AVENGERS isn't obnoxiously 3D." "There's no, 'Oh look, we're going to spend 20 minutes going through this tunnel because it's in 3D!' And no one is pointing at the screen the entire time. But it's an action movie. Things tend to hurtle toward the screen anyway." Whedon says he was 100% behind the idea from the beginning. "Yeah,
