

They've been teasing us for days, but Warner Bros. has finally released a new trailer for Kong: Skull Island. In it, we get a first look at a number of very unusual creatures, and it's now apparent that King Kong's home is infested with monsters. It almost looks like he's protecting the world from them, but that's clearly not going to stop the invading humans from trying to take him down once and for all. Speaking of which, the humans get a fair bit of screentime here, and the trailer does an excellent job of spotlighting Kong: Skull Island's incredible cast. It's Kong who is obviously the real attraction though! The impressive cast of Kong: Skull Island includes Tom Hiddleston, Samuel L. Jackson, Brie Larson, John Goodman, and John C. Reilly, and it's currently set to be released worldwide on March 10th, 2017.
