

We may have now seen the first official colour images from Logan, but that mysterious Instagram account is still sharing black and white images. The latest photo shows off what looks an awful lot like surgical equipment, and it's hard not to wonder if this might somehow be tied to the creation of X-23. At the end of X-Men: Apocalypse, we saw an Essex Corp employee taking Wolverine's DNA samples, and Laura is his clone in the comic books, so it seems at least somewhat likely that we'll get to see, or at least learn more about, her creation. Does that Mr. Sinister will show up? Well, time will tell. Logan stars Hugh Jackman, Dafne Keen, Boyd Holbrook, Richard E. Grant, Stephen Merchant, and Patrick Stewart. It's currently set to be released on March 3rd, 2017, so stick to CBM for updates.
