

If you need further proof that Doctor Strange is going to be the most visually unique Marvel Studios movie to date, look no further than this trippy featurette. Exploring how Steve Ditko's artwork inspired the Scott Derrickson helmed release, we see his comic book covers and panels brought to life here to amazing effect as The Ancient One sends the good doctor hurtling through different dimensions. Doctor Strange follows the story of neurosurgeon Doctor Stephen Strange who, after a horrific car accident, discovers the hidden world of magic and alternate dimensions. Set for release on November 4th, later this year, the cast includes Benedict Cumberbatch, Chiwetel Ejiofor, Rachel McAdams, Benedict Wong, Michael Stuhlbarg, Mads Mikkelsen, Tilda Swinton, and maybe even Robert Downey Jr.
