

Another official black and white Logan image has been released, and this time it's not a road sign or a derelict building, but an actual character from the film. The pic introduces one of the villainous Reavers, and though he's not named here the actor playing him is believed to be David Kallaway. In addition, the guys over at OmegaUnderground have come across some previously unreleased set pics, which give us a look at some of his teammates. You'll notice Boyd Holbrook's Donald Pierce is going to have some kind of bionic arm, which is a nod to the character's cyborg roots in the comic books.
