

The second trailer for James Mangold's Logan should be with us very soon, but in the meantime, the director has shared some more images from the movie on Twitter. The pics provide us with new looks at Patrick Stewart as Charles Xavier, Dafne Keen as Laua/X-23, and Hugh Jackman as the iconic mutant of the title. Logan is set to have its world premiere next month at the Berlin International Film Festival, and after the overwhelmingly positive reaction to a recent screening of the first 40 minutes, fans will be looking forward to finding out how the full movie is received. In the near future, a weary Logan cares for an ailing Professor X in a hide out on the Mexican border. But Logan's attempts to hide from the world and his legacy are up-ended when a young mutant arrives, being pursued by dark forces. Logan claws its way into theaters on March 3.
