

We were told to expect some kind of reveal, and now director James Mangold has shared some very interesting new Wolverine 3 details via a page from the movie's script. As you can see (you may need to squint!), the story will indeed focus on an older incarnation of Logan (Hugh Jackman), who has taken to the drink as a way to combat the effects of his fading healing factor. We are also introduced to The Bangers, who will probably serve as initial claw-fodder for the mutant berserker - though they actually seem to be doing pretty well here. The Bangers are most likely a version of the Marvel Comics supervillain team who were formerly known as Nth Command, though their most prominent member, Henry Akai, doesn't seem to be one of Wolverine's attackers. Mangold also makes it very clear that this is a much more vulnerable take on Wolvie than we're used to seeing - perhaps those rumors of his impending death
