

Haven't seen Doctor Strange yet? Well, stop reading now! Still here? In the final act, Stephen Strange travels into the Dark Dimension and comes face to face with Dormammu, but if he looked familiar, it's because Benedict Cumberbatch played a key role in bringing him to life. Talking to IGN recently, director Scott Derrickson revealed who played the villain (he's not listed in the credits). "The voice was a British actor whose name I don't know, and Benedict – Benedict did the facial capture for it." Asked whether this was done to leave the door open to a bigger name star being cast somewhere down the line (similar to Josh Brolin being cast as Thanos), the filmmaker replied: "No, no, it wasn't that at all. We knew it was an all CG character, but as we were in production Benedict brought it up as an idea. He said, 'What would you think about me doing it?' I said, 'Let me think about
