

During a freak accident involving an experimental microwave antenna, two tower engineers gain superhuman abilities. While the powers they gain are similar, the paths they decide to take are not. Derek Powers wants to use his abilities to help others and to uncover the truth behind Randall Communications Incorporated (RCI), the company who designed the antenna. Meanwhile, Jay Powers secretly becomes part of the experiments performed by RCI, whose lead scientist, Tina Viccarini, is a former love interest of Jay. This series of events ultimately leads to the birth of a new superhero and supervillain. The Photon Effect has a well-paced storyline which successfully blends in humor and action with characters that draw your attention. Director/Writer Dan Poole brings his own character to life playing Derek Powers opposite Derek Minter who plays Jay Powers (Photon's cousin). One thing that could make or break a movie for me is how well the dialogue
