

Thanks to the lads at Live For Films we now have even more new shots from Marc Webb's The Amazing Spider-Man. As you can see there are also scans of the print from Empire which is sure to contain some new juicy info about the movie. You can decipher what you can for yourselves here, but I'll have a proper read through the un-cropped pages and see if there is anything worth reporting on. Until then enjoy these new pics.. Big thanks to Live For Films for sending on the scans, be sure to drop over and check out their awesome site. And of course thanks to Empire for taking the pics. By TwitterButtons.com
