

More Logan images from the latest issue of Empire Magazine have surfaced today, and as you can see, they give us a new look at pretty much the entire cast. Hugh Jackman's Wolverine can be seen chomping a cigar, we get a very cool shot of Caliban (a character we first met in X-Men: Apocalypse), while the villainous Zander Rise and Donald Pierce also take centre stage in these latest images. These don't reveal a lot of new plot details, though the shot of Wolverine being restrained by the Reavers is very interesting, especially as he would have effortlessly taken them down in the past! Logan stars Hugh Jackman, Dafne Keen, Boyd Holbrook, Richard E. Grant, Stephen Merchant, and Patrick Stewart. It's currently set to be released on March 3rd, 2017, so stick to CBM for updates.
