

Thanks to Studio Ciné Live (via lestoilesheroiques) we have some new behind-the-scenes snaps of Patty Jenkins and her crew filming Wonder Woman on the beaches of Palinuro, Italy, last year. A couple of the shots aren't the best quality, but the one of Gal Gadot directly below is decent resolution. The mag also shared some quotes from an interview with Chris Pine, who plays Steve Trevor in the movie. He doesn't spill anything too revealing, but we do get a good idea of what Trevor was up to before being shot down over Themyscira, and possibly the film's McGuffin. "I play a pilot working for the Allied spies and the Germans without their knowledge ,. My character steals a notebook filled with scientific formulas in an Ottoman base. He steals a plane but is shot down in the sea. " Wonder Woman charges into theaters June 2, 2017.
