

Per our sister site AnimeMojo.com, the official premiere date of Attack on Titan season 2 has revealed to be April 1. The new season comes 4 years after the first ended after 25 episodes in 2013. The reason behind the delay between season 1 and season 2 was due to the fact that Hajime Isayama's manga was still fairly new at the time of the first anime season and the TV adaptation quickly caught up with where Isayama was in the manga. Rather than continue on with an original story, the folks at Studio WIT opted to wait and allow the manga to create a ton of separation. However, given the show's popularity, the manga quickly became a fan favorite and spoilers for season 2 have been floating around on the internet for quite some time. If you were a fan of season 1, have you managed to avoid spoilers over the past 4 years or did you succumb to temptation? **ATTACK ON TITAN**
