

The Extended Cut of Suicide Squad is now available on Digital HD, but based on what we've heard so far, the extra footage doesn't really have the same impact that the scenes added to Batman v Superman: Dawn of Justice's Ultimate Edition did. Regardless, Batman-News has now come across a very cool special feature which is currently only available to those who buy the film via VUDU on their iOS app. As you can see, the images below provide a great look at Harley Quinn's various tattoos, something cosplayers - or admirers of Margot Robbie's body - will definitely appreciate. Unfortunately, not all of these offer up any new Easter Eggs, but they're all still pretty cool. You have to believe that there are probably some fans out there who may actually get a real tattoo based on some of these designs!
