

Below are the five winners of the polls we have conducted over the last few months to determine the best comic book based movie out there today. We tried to make it as fair and varied as possible, we definitely covered every CBM (within reason, you didn't have the option to vote on Nic Fury: Agent Of S.H.I.E.L.D!) there was anyway. And all brands, studios and sub genres got a fair shake. The five winners might not be very surprising, but I think it would be hard to argue with any of them belonging on this list at the same time. I know that won't stop some of you! And that's the fun of it, so vote away, and sound off below. By
