

The prolific author inspired a number of our most beloved writers, creators and thinkers. Bradbury was a man who many would say spurred humanity to explore space and long ago predicted many of the technological advancements that we enjoy today. Without his writings providing a foundation, there might not be an E.T. or an Aliens. Similarly, there might not be a Guardians of the Galaxy or a Green Lantern Corps. without the Bradbury stories that came before. He's a talent that will truly be missed and should be remembered and celebrated by all those who enjoy the science-fiction genre. Here are some choice words from some of America's most well-known figures about the author, the man and the legend--- President Obama , "His gift for storytelling reshaped our culture and expanded our world. But Ray also understood that our imaginations could be used as a tool for better understanding,
