

So, the holy grail of CBMs is finally upon us. To say that Marvel's The Avengers is the most anticipated comic book movie of all time is no overstatement. Sure, most of us are just as excited for the Batman threequel coming our way, but Joss Whedon's superhero team-up flick is truly the first of its kind. I don't need to tell you the history, you've been watching right along with me after all! But although those last five Marvel movies have been building to this, and there are obviously some things that carry over, The Avengers feels very much like its own thing, and not - as some previous movies felt at times let's be honest - just a trailer or preview to something bigger. The something bigger is here. As other reviews have already pointed out, as much as we have seen from The Avengers via clips, trailers and tv
