This from the blog... And the fire truck is ... Sentinel Prime! RUMOR: The Ark might be ... Omega Supreme? A reader alerted us to an interesting image. This is a rendering of the Ark, the ship appeared in the trailer for Transformers: Dark of the Moon, TRANSFORMERS! The hypothesis is that there may be Omega Supreme ("advanced weapon resembling the namesake of the series G1 Autobot that transforms into the spaceship land division which looks like the Ark of the G1 series" source Wikipedia). Obviously this is not the official image (or at least not yet), what do you think? The release of Transformers: The Dark of the Moon is scheduled for July 1, 2011 in America.
