

Scarlett Johansson recently sat down with Playboy for a lengthy interview, and while there was sadly no mention of Avengers: Infinity War and the Marvel Cinematic Universe, she did address the whitewashing controversy surrounding Ghost in the Shell. The Major is typically portrayed as being Japanese, so the casting of a white actress in the role hasn't sat well with many fans. That's despite the fact that Johansson is such a well-liked and big star, and when she was asked about her awareness of what people have been saying about this, the actress responded: "I think the conversation about diversity in Hollywood is an important one and one that we should be having. My character has the unique experience of being a person whose human brain has been put into what was essentially a synthetic robotic body. I guess I always thought the character was a universal one, in the sense that she has no identity, and the heart of this story is
