

Frankenstein (and his monster) have been a staple of movies, comics, cartoons etc for a very long time now. But we haven't seen a proper movie version since Kenneth Branagh's mediocre adaptation back in 1994. But now it seems the good Dr and his lumbering creation are about to come back into fashion, as two movies are on the horizon. One is the comic book adaptation, Frankenstein, and the other is Shawn Levy's more classic approach to the story under Fox Studios. While chatting to Collider Levy drops a few details. He says the monster will be brought to life using the same technology as the robots in Real Steel, while revealing that in this version there will be more than one of them.. “In the case of Frankenstein, my whole approach is based on a mo-cap SimulCam playback so that it's not a dude with scars on his face. It's not
