

Cyclops is dead. As a massive fan of the character, it pains me to write that, but you have to give Charles Soule and Jeff Lemire credit for at least handling it in a pretty clever way in today's Death of X #4. The issue saw Scott Summers attempt to stop the Terrigen Mists from killing any more mutants by changing it at a molecular level, but as his conversation with Black Bolt and Medusa became more heated and he got ready to unleash an optic blast, the former obliterated him with a whisper. Was it self defence on Black Bolt's part? Did Scott get what was coming to him? Well, it turns out that wasn't Cyclops at all. Instead, it was a psychic projection created by Emma Frost because the leader of the X-Men has actually been dead ever since he was exposed to the same Terrigen Mists which killed Multiple Man. That happened back in Death of X #1, and
