

The demand for movies revolving around Han Solo and Boba Fett pales in comparison to how much Star Wars fans want to see Ewan McGregor star in his own Obi-Wan Kenobi spinoff. Why it hasn't already been announced is baffling, but it sounds like there may be a very good reason for that. However, before you go any further, be warned that possible spoilers for the current trilogy do follow! During a recent podcast appearance, Entertainment Weekly reporter Anthony Breznican was asked about a solo outing for Obi-Wan, and his response was very interesting indeed. "I have heard rumors that the one reason they haven't moved sooner on Obi-Wan is that they're not done with Obi-Wan quite yet in the Saga films. So I wouldn't be surprised to see an Obi-Wan thing happen beyond Episode IX." He doesn't elaborate on that beyond some speculation, but it's food for thought! While Obi-Wan obviously won't be resurrected in the new trilogy, some sort of big reveal
