

Notes the site, "Each of the 178 episodes spanning The Next Generation's seven seasons will be transferred to true high-definition 1080p for release in the Blu-ray format and, eventually, for runs on television and digital platforms in the U.S. and across the world.... 'Fans have been clamoring for a high-definition release of Star Trek: The Next Generation,' Ken Ross, Executive Vice President and General Manager of CBS Entertainment, said in a statement. 'Transferring the series to high-definition presented difficult technical challenges, but our team has come up with a process to create true 1080p HD masters with true HD visual effects. We can't wait to show fans how pristine the series looks and sounds with our upcoming Blu-ray releases.' "CBS is, in fact, returning to the original film negatives, a mother lode of material encompassing 25,000-plus reels of footage, and editing the episodes together precisely as they were when they originally aired
