

It's been discussed heavily before, but do you think that orbiting mass seen in the first trailer and in the latest TV spot below is Unicron? If so, it doesn't look like he'll be transforming into robot mode. From what little we know about the film, Optimus Prime returns from the space journey he undertook in the final moments of Age of Extinction but it seems he's been corrupted or possessed by dark energon. Will Bumblebee and the remaining Autobots on Earth be able to defend the planet against their leader and mentor? We'll find out when Transformers: The Last Knight arrives in theaters on June 23, 2017.
