

Kotobukiya proudly presents Iron Man Mark VII ARTFX statue from Marvel Studios' THE AVENGERS MOVIE coming in May 2012. New 3D sculpting includes more fine detailing than previous handsculpted releases for a more dynamic display. Dynamic pose catches Iron Man in action, firing his chest-mounted beam weapon with an LED light-up feature with three different modes: Off, Continuous On, and triggered via the built-in motion detector. Iron Man's eyes also feature continuous LED lighting in both modes. This ARTFX statue in 1/6 scale stands nearly 33 cm tall including the georama base, and consists of pre-painted snap-fit parts for easy and quick assembly.
