

Talking to the press in Istanbul, Turkey; director Same Mendes has promised a return to the version of James Bond seen in Ian Fleming's original novels with Skyfall later this year. "What Fleming created was a very conflicted character," said Mendes. "Some of those things are explored in this movie because Daniel as an actor is capable of exploring them and I am interested in exploring them too. That was a big thing for me, having a Bond who I believed in, who I felt could take the character to a new level. I could imagine another actor and I wouldn't have wanted to do it." This is sure to come as good news to fans of the books who haven't enjoyed the sillier take on the spy over the years and you can check out some more revealing insights from the cast and crew in the press conference highlights below.
