

Yet another new image has been released from Logan, and this once again leaves us with a lot of questions. For starters, what is Wolverine up to and where is he? Well, to hazard a guess, it appears as if he's taken out one of the Reavers in a suburban setting, but it's obviously impossible to put together the pieces without any context. Even so, there's no denying that this is a very cool shot of the hero. Since the release of the first Logan teaser trailer, we haven't actually seen any official colour stills, so it will be interesting to see if those follow in the next few months or we'll just get more like this one. Logan stars Hugh Jackman, Dafne Keen, Boyd Holbrook, Richard E. Grant, Stephen Merchant, and Patrick Stewart. It's currently set to be released on March 3rd, 2017, so stick to CBM for updates. Silence
