

What the future holds for 20th Century Fox's X-Men universe is anyone's guess? After reigniting the franchise with X-Men: Days of Future Past, X-Men: Apocalypse landed with a dud. Now, franchise headliners Jennifer Lawrence and Michael Fassbender are indicating that they may not reprise their roles as Mystique and Magneto. Add to that with the various hints from Jackman that he's hanging up the claws after Logan and the future of the X-Men film franchise turns into a blank canvas. Will the next iteration of films focus on Josh Boone's New Mutants films? Or are we standing on the precipice of a cliff that leads to a downward spiral and the eventual return of the film rights to Marvel Studios? Logan is directed by James Mangold and arrives in theaters on March 3, 2017.
