

3D is all the craze these days, isn't it? Whether it's shot in the format or post-converted. Well, Fox Russia have now confirmed that director James Mangold's The Wolverine will be released in the latter format when it hits cinemas next July. This will be the first X-Men film to be released in 3D, and the increased ticket prices that come with watching a film in the format should greatly improve the film's gross at the Box Office. So, will you be seeing The Wolverine in 3D? Sound off in the comments below. Fox Russia confirmed THE WOLVERINE will be in 3D— Stark Industries Ru (@Ultimate_SI) October 29, 2012 The Wolverine is directed by James Mangold and stars Hugh Jackman as Logan/Wolverine, Hiroyuki Sanada as Shingen Yashida, Hal Yamanouchi as Yashida, Tao Okamoto as Mariko Yashida, Rila [frick]ushima as Yukio, Will Yun Lee as Kenuichio Harada, Brian Tee as Noburo Mori and Svetlana
