

When the logo for Thor: Ragnarok was first revealed, it's fair to say that most of us were confused by the 1980s inspired visual aesthetic. Since then, set photos have made it clear that the movie has been inspired by the artwork of Walt Simonson, but now some changes have been made which bring it more in line with the amazingly trippy 1960s artwork by Jack Kirby also featured on the t-shirt down below. Whether this should be taken as an indication that we'll see a device like that in the movie remains to be seen, but given how unique Thor: Ragnarok is shaping up to be, it wouldn't really be that shocking! We'll have to wait and see, but Marvel Studios has been updating a lot of logos recently, including Avengers: Infinity War (which may just be Infinity War now). What do you guys think of this redesign?
